Republicans Overseas Stands with President Trump Against Democrat Injustice and Tyranny

SALEM, OR – August 25, 2023 – Republicans Overseas condemns the Democrats’ weaponization of the United States judicial system and calls—yet again— on Democrats to cease their political persecution of President Trump and our justice system.

The mug shot of President Trump taken during his arrest in Fulton, Georgia marks an egregious and dangerous turning point in American politics. For the first time in American history, the party in power is seeking to jail its chief opposition and deprive that opposition of legal counsel.

The unjust prosecution of President Trump in Georgia seeks to criminalize concerns about election integrity, deprive Republicans of their First Amendment rights to free speech, and criminalize the practice of law in defense of Republican politicians. The two-tier system of justice is on full display for the American people to see and reject.

Solomon Yue, CEO of Republicans Overseas, states, “The BeijingBiden administration is targeting President Trump to remove its chief political opposition. This kind of political prosecution could only happen in Putin’s Russia. Now these tyrannical political persecutions are happening in Biden’s America time after time. The American people must demand a halt to this police state behavior.”

Republicans Overseas supports Congressman Jim Jordan’s efforts to seek out any collusion between radical Democrat activist District Attorney Fani Willis and the federal government in the Georgia court case. Democrats must cease behaving like communist autocrats who jail their opponents, reject their own radical politicians, call for a restoration of true justice, and end the censorship and legal targeting of their fellow countrymen and women.
